Hello Marietta:

Following up from our call just now, here is the revised, freestanding slide deck for you to send for review.

Also, I checked and EPA's 24c guidance website has not yet been updated, so we still need to wait before adding a link on slide 33, "State Modifications to Labels."

Hello Marietta:

Aside from the % certainty question you flagged for EFED today and the names of BEAD's speakers, the dicamba slide deck for states is ready for higher-level review.

I will be in the office today and tomorrow, and on leave the week of Thanksgiving. Lydia should be able to help with any further updates to the slide deck while I am out.

Mark: Marietta just added a comment on slide 15 that's EFED relevant. I just added the text in red to respond to Marietta's request, but would like you to confirm the language is okay.

- DTE analysis indicated need for

- 240 ft in-field downwind spray drift\* setback in all registered counties for FIFRA, based on a 90% certainty of no effects to endangered species
